

Bootcamp
 Atlas&Weak Signals INTRO
 Bio&Agri Zero
 Living with your own ideas
 Tech Beyond the Mith
 Community Engagement
 Extended Intelligences
 Designing for the Next Bil. Sec.
 Design Studio 1

SKILLS

starting create our website
 communication about environment
 beeing critical about different topics
 making and working with materials
 creating fast & good product ideas
 thinking outside the box
 coding
 digital fabrication
 connecting to people and my body
 designing for social systems
 making classifications with data
 try and recognize image generation
 designing in a kollektive way
 innovative soluctions for fast future
 reflecting & using thoughts/ideas
 using my knowledge for innovations

KNOWLEDGE

what the master is about
 inspiring places around Poblenau
 analysing the crises
 getting to know good & bad signals
 getting to know new materials
 understand possible applications
 experience different life adventures
 combination technology&crafts
 possibilities about block&supplych.
 potential of coding & digital fabrics
 ecosystems and its possibilities
 communities in Barcelona
 learning about AI & its possibilities
 machine learning
 post-technological futures
 which master project i want to do
 learning about weak signals

ATTITUDE

starting to reflect on our motivation
 understanding what is good for me
 being more self-aware
 critical point about bio-hacking
 positive aspects for new projects
 stopping to rethink to much
 starting to create more and faster
 critical about things&obsolescence
 understanding what i want & need
 combining design with the use of AI
 making faster decisions
 exploring myself & find speciality
 communicative what i do/thoughts
